CALL LAB :

INTRODUCTION TO PRONUNCIATION

What is good English pronunciation?

* There are three levels of English pronunciation.

LEVEL 1: People don't understand you because of wrong sounds you make while pronouncing.

LEVEL 2: People understand you but it's unpleasant to hear.

LEVEL 3: People understand you & your English is good to listen.

The Rule is:

* If you are close to the standards, you can always communicate, and your English will be pleasant.

* If you are far from the standard, sometimes you won't communicate successfully.

NOTE: Level 3 is called as good pronunciation.

* It is not necessary to speak "perfect American (or) British accent" but your accent must be close to the standards.

* We can watch channels like CNN international, NBC, Euro News (or) Eky News on TV.

Why should you study English pronunciation?

First impression:

* Pronunciation is definitely the biggest thing that people notice when you are speaking English.

* By saying a sentence or two they will notice if your pronunciation is good (or) bad.

NOTE: Your pronunciation creates the first impression you make.

Communication:

* Good pronunciation should be one of the first things that you learn in English.

* You can live with simple vocabulary and simple grammar but there is no such thing for pronunciation, only good pronunciation (or) bad pronunciation.

Can you communicate in English?

* Everyone say "I don't need to study pronunciation."

I just want to communicate in English, communicating with friends and teachers is not the proper test. Try to talk to native people in America or Britain i.e. clerks, drivers, vendors, etc. If they understand you, then you communicate in English.

SELF INTRODUCTION

Hello Everyone!

Today, I am here to introduce myself. My name is Jyothi Prasanna. I'm from Hyderabad. I have done my schooling from Naagarjuna Talent School, Medchal and I've completed my intermediate from Excellencia Junior College at Buchitra in Hyderabad. I am currently pursuing my Engineering at IARE with a specialization of Data Science. Talking about my parents, my mom is a homemaker and my dad is a corporator and a real estate agent.

My biggest strength is being strong and never giving up. I always try my best at everything. My role model and my biggest supporter is my math teacher. He was our homeroom teacher from class sixth to tenth. He is hardworking, efficient and a calm person. He always helps us and support us. He always deals any situation in a smooth way intending not to hurt anyone. He not only teaches the subject but also teaches moral ethics and discipline. He always push us to walk in the correct path whatsoever. He never fails to motivate and inspire us. And he loves us a lot.

Thank you!

INTRODUCING OTHERS (A FRIEND)

Good morning / afternoon everyone,

It's my pleasure to stand here and introduce my friend. Her name is Krishna Durga Devi. In short it's Krishna. She is from Hyderabad. She is a calm and warm person. She has done her schooling from Nava Jyothi High School at Hyderabad. And, completed her intermediate from TSRTC college in Warangal. She is currently pursuing her Engineering at IARE with a specialization branch of Data Science. Her father's name is Venkateswara Rao and he is a private employee. Her mother is a homemaker. She has an elder sister and her name is Chandrakala. Her sister always fights with her and she is working as a teacher in Narayana High School.

Her strengths are patience, hardwork and dedication to the given work. She usually thinks a lot about the things that are unnecessary. Her hobbies are listening to music, reading books & knowing facts. Her short term goal is to study M.Tech in top university and her long term goal is to become a Data Scientist.

Thank you!
